5. Background and Purpose of Application

1) Current challenges in the organization in relation to the theme of the KCCP you are applying:

Describe the issues that your organization/department intends to tackle by participating in this program.

Improve the methodology of risk scenarios in road infrastructure

Currently, CENEPRED's disaster risk scenarios utilize weather forecasts and climate projections generated by the National Meteorological and Hydrological Service (SENAMHI). By integrating these hazard inputs with general exposure and vulnerability datasets, our team develops multi-sectoral risk scenarios for floods and mass movements. While valuable, these existing products are designed as broad assessments for multiple public sectors, lacking the specific engineering parameters required for specialized transportation management.

Therefore, tailoring this methodology specifically to the National Road Network will significantly enhance our operational capability to identify, in advance, highway corridors and road segments exposed to extreme hydrometeorological hazards, landslides, debris flows (huaicos), and flooding.

Technical articulation and institutional synergy with the Ministry of Transport and Communications

While CENEPRED generates valuable prospective and corrective risk information, a significant operational gap remains in translating these assessments into the road planning, engineering design, and preventive maintenance cycles managed by transport authorities. Through this training, CENEPRED seeks to establish an inter-institutional collaboration mechanism with the Ministry of Transport and Communications (MTC / PROVIAS) to co-develop a specialized, actionable product: Risk study associated with road networks.

2) Main duties of Applicant:

Describe your main duties and responsibilities in relation to this program.

Geospatial modeling of hydrometeorological hazards: Formulating national and regional disaster risk scenarios by integrating rainfall forecasts and climatological data, using GIS and spatial programming to identify areas vulnerable to severe hydrometeorological events.

Methodological development for risk reduction: Contributing to standardizing geospatial workflows to translate weather warnings into actionable risk scenarios

3) Relevant Experience of Applicant:

Describe previous occupational experiences that is highly relevant in this program.

Prior to my role at CENEPRED, I served as a Meteorologist Analyst at INDECI/COEN (2020–2026), where I provided technical assessments for operational decision-making during severe hydrometeorological emergencies, tracking real-time hazard impacts on critical connectivity and coordinating response protocols with sector authorities. Previously, as a Meteorologist Specialist at SENAMHI (2015–2020), I led severe weather forecasting and conducted applied research in mountain meteorology and early warning systems across Andean basins. This cumulative experience enables me to directly apply the acquired methodologies at CENEPRED, enhancing risk modeling and developing actionable risk scenarios tailored to our national road network.

4) Your individual Goal:

Elaborate on the applicant's plans to apply the lessons learned from this program to the applicant's organization.

Upon completing the program, I will apply the acquired knowledge at CENEPRED through two direct actions aligned with the Action Plan:

Upgrade Risk Scenario Methodologies: Evaluate how integrate or adapt Japanese standards for precipitation-induced landslide mechanisms and slope stability analysis to establish calibrated rainfall thresholds for mountain road cuts.

Develop a Road Network Risk Protocol: Formulate a specialized geospatial workflow to evaluate slope fragility and hazard exposure across critical Andean highway corridors.

5) Area of Interest and/or your expectation:

Specify the applicant's particular interest with reference to the contents of this program.

My particular interest focuses on the modules covering mechanisms of rain-induced disasters, slope stability analysis, and sensing and monitoring technologies, topics that directly align with my meteorological background and professional research. I am driven by the commitment to enhance CENEPRED's disaster risk scenarios and optimize their practical application along our national and regional road networks. In recent years, recurring extreme hydrometeorological events in Peru have caused severe landslides and debris flows (huaicos), cutting off critical highways, disrupting local commerce, and paralyzing supply chains and passenger travel. Building future resilience requires understanding today's physical trigger mechanisms and executing proactive measures now. This program will equip me with the technical expertise to bridge atmospheric forecasting with risk scenarios into evidence-based preventive interventions that safeguard national connectivity

It is evident that moving to a different environment can affect your physical and mental health compared to living in your home country, even under normal circumstances.

Pregnancy—regardless of the stage—may pose health risks to both mother and child. Our approach prioritizes the health and safety of both. In addition, medical expenses related to pregnancy, childbirth, and care for the child (or fetus) are not covered by the insurance provided by JICA. If the participant's stay in Japan needs to be extended, the associated living expenses will also not be covered, which could result in a significant financial burden on the participant.

Given the above circumstances, pregnant applicants are required to promptly schedule a consultation with JICA.
All individuals with pre-existing conditions must notify JICA in advance. (Please complete Form 3)

Pre-existing conditions :Chronic diseases, Conditions currently under treatment and Past illnesses that have resolved.

It is required to submit a medical certificate from your doctor confirming that you are medically cleared to take part in the KCCP in Japan.

Medical expenses related to pre-existing conditions are not covered by the insurance

It is important to understand that failing to provide your health information in advance may lead to situations where, despite our best efforts to prioritize your safety, effective intervention could become extremely difficult.

For further details, please refer to KENSHUIN GUIDE BOOK Medical Services.
